

Foundation Readiness Check

Confirm your organization is ready to scale AI safely. Score each item Yes or No, then total your results.

Assessment Metadata

Organization	
Assessment date	
Facilitator / owner	
Participants	

Scoring Method

- Mark each item as Yes or No.
- Count total Yes results.
- Use the interpretation table below.

Score	Interpretation	Recommended action
0–17	High readiness risk	Fix core gaps before production AI deployment
18–27	Partial readiness	Start only with low-risk, supervised use cases
28–34	Strong readiness baseline	Proceed with controlled scale-up

1. Process Maturity (4)

- ☐ Key processes are documented with steps and decision points.
- ☐ Process owners are assigned and accountable.
- ☐ Performance baselines exist (time, error, cost).
- ☐ Exception paths are mapped beyond the happy path.

Notes / gaps

2. Data Foundation (5)

- ☐ Data inventory is complete for major datasets.
- ☐ Classification scheme is defined and applied.
- ☐ Data quality standards are defined per dataset.
- ☐ Lineage is documented for critical datasets.
- ☐ Dataset ownership is assigned.

Notes / gaps

3. Information Security (5)

- ☐ Security policy is documented and approved.
- ☐ IAM and RBAC follow least privilege.
- ☐ Secrets management is in use for credentials and keys.
- ☐ Secure engineering practices apply to AI components.
- ☐ AI-related incident response plan is tested.

Notes / gaps

4. Privacy and Compliance (5)

- ☐ PII is mapped with legal basis and purpose.
- ☐ Applicable regulations are identified and tracked.
- ☐ Privacy-by-design controls are applied by default.
- ☐ Legal review is required before deployment.
- ☐ Retention and deletion policies cover AI training data.

Notes / gaps

5. Technology Baseline (5)

- ☐ Cloud and AI platform standards are defined.
- ☐ API standards and service catalog exist.
- ☐ Identity and SSO integration is available.
- ☐ Observability standards are enforced.
- ☐ CI/CD includes test, security, and approval gates.

Notes / gaps

6. People and Change (5)

- ☐ AI literacy baseline exists for employees.
- ☐ Executive sponsors are named and active.
- ☐ Change management capability is in place.
- ☐ Reskilling paths exist for impacted roles.
- ☐ Feedback channels exist for AI adoption issues.

Notes / gaps

7. Ethics and Principles (5)

- ☐ AI principles are formally adopted.
- ☐ Ethics owner or committee is assigned.
- ☐ Bias assessment process is defined.
- ☐ Explainability standards exist for high-impact decisions.
- ☐ Override and appeal paths are documented.

Notes / gaps

Summary

Domain	Items	Yes	No	Priority gaps
Process Maturity	4			
Data Foundation	5			
Information Security	5			
Privacy and Compliance	5			
Technology Baseline	5			
People and Change	5			
Ethics and Principles	5			
Total	34			

Overall interpretation and next actions
