

Readiness Assessment Worksheet

Baseline readiness across the six framework pillars, align stakeholders, and prioritize next actions.

Assessment Metadata

Organization name	
Assessment date	
Facilitator / owner	
Current AI stage	Just Starting / Exploring / Piloting / Scaling / Advanced

1. Value (Why)

Prompts

- What is your one-sentence AI North Star?
- What are the top three business priorities AI must support?
- Which metrics will prove improvement in efficiency, quality, and capability?

Responses

Checklist

- ☐ Leadership aligns on value priorities.
- ☐ Success metrics are defined and baselined.
- ☐ North Star outcome is documented and shared.
- ☐ AI investments map to business strategy.
- ☐ Finance is involved in value definition.

2. Use Cases (Where)

Use case inventory

Use case	Type	Owner	Impact	Effort	Risk	Priority

Type options: Automation / Augmentation / Generation / Prediction / Optimization

Checklist

- ☐ Use case inventory exists.
- ☐ Scoring criteria are defined and applied.
- ☐ Top 3–10 use cases are selected.
- ☐ Owners are assigned to prioritized use cases.
- ☐ Intake process exists for new use cases.

3. Operating Model (How)

Human-AI mode selection

Process area	Assistive	Co-Pilot	Autonomous	Notes
Customer-facing				
Internal operations				
Decision workflows				
Data and analytics				

Checklist

- ☐ Future-state workflows are mapped.
- ☐ Human-AI handoff points are defined.
- ☐ Decision ownership is documented.
- ☐ Exception and escalation paths exist.
- ☐ End users participated in design.

4. Foundation (What Enables It)

Readiness rating

Area	Not ready	In progress	Ready	Notes
Data quality and access				
Data governance and permissions				
AI tools and models				
Platform and infrastructure				
API and system integration				

Checklist

- ☐ Data sources for priority use cases are validated.
- ☐ Governance and access controls are active.
- ☐ Tools and models are selected or shortlisted.
- ☐ Integration requirements are mapped.
- ☐ Minimum viable foundation is defined.

5. Governance (Control and Trust)

Control coverage

Area	Status	Owner	Evidence
Privacy policy and data handling			
Access control and identity			
Bias and accuracy testing			
Legal and regulatory review			
Audit logging and override			

Checklist

- ☐ AI privacy policy is defined and communicated.
- ☐ Security review is required before deployment.
- ☐ Bias and performance thresholds are defined.
- ☐ AI risk register is maintained.
- ☐ Audit logging and override mechanisms are active.

6. Execution (How It Happens)

Delivery model

- ☐ Framework-driven
- ☐ Hierarchical (top-down)
- ☐ Pragmatic (bottom-up)
- ☐ Hybrid

Role assignment

Role	Assigned person	Team	Status
Explorer			
Operator			
Architect			
Orchestrator			

Checklist

- ☐ Delivery approach is selected and communicated.
- ☐ Roles are assigned with clear accountability.
- ☐ 6–12 month roadmap is documented.
- ☐ Change management plan is active.
- ☐ Adoption metrics are defined.
- ☐ Continuous improvement loop is in place.

Consolidated Summary

Section	Items	Completed	Notes
Value	5		
Use Cases	5		
Operating Model	5		
Foundation	5		
Governance	5		
Execution	6		
Total	31		

Priority next actions
